The Bivalent Booster

X Myth:

I don't need the booster because I am already vaccinated, or I already had COVID.

It's better if I just get COVID, then I would have natural immunity.

The COVID-19 pandemic is over and new variants are mild, like a cold.

I don't qualify for the bivalent booster.

✓ Fact:

Protections against COVID-19 gained through vaccination or prior infection wane over time and with the introduction of new variants.

Catching COVID-19 is a risky way to build immunity & ups the risk for long COVID & severe outcomes.

New variants continue to emerge, all capable of causing severe illness. The bivalent booster has been shown to help minimize the impact.

Most people 5 years and older are now eligible if they received their last COVID vaccine at least 2 months ago.

Getting Boosted

Bivalent boosters are available at 1,000+ sites:

- Pharmacies
- Health Clinics
- Drive-thru locations
- Community Events
- Schools & Churches

Bivalent boosters:

- Are free
- Do not require disclosure of immigration status
- Often don't require an appointment
- Are for people 5 years and older
