

PrEP = Max HIV Protection

Just 7 days of daily use for receptive and anal sex.

Stay Strong & Power on

- **Take your PrEP pill daily:**
Missing doses will LOWER how well the medication works!
- **PrEP is the most effective:**
AFTER 21 days if you are having vaginal/front hole sex or sharing needles.

CONTACT YOUR PROVIDER IF YOU **STOP** TAKING PrEP

- If you STOP taking PrEP for more than 7 days (for cisgender males and transgender females) or 3 days (for cisgender females and transgender males), contact your provider as your chances of getting HIV INCREASE.
