

WHAT IS APRETUDE?

1

The first and only long-acting injectable PrEP for reducing the risk of getting HIV

2

Designed to continuously help prevent the risk of getting HIV when taken every other month

3

No daily PrEP pills to remember or keep track of while you are receiving your APRETUDE injection

4

You must be HIV-1 negative to start and stay on APRETUDE. Your healthcare provider will test you for HIV before each injection.
