# Four Action Steps to Reduce Risk from BA.2

1

## GET VACCINATED AND/OR BOOSTED AS SOON AS POSSIBLE

Being fully vaccinated provides strong protection against infection, hospitalization, and death. Being vaccinated and boosted provides the BEST protection.

2

## TALK TO YOUR PROVIDER NOW ABOUT THERAPEUTICS

If you can't get vaccinated due to medical reasons or your body can't mount an appropriate immune response, ask your provider about the therapeutic, Evusheld. If you test positive, ask your provider about treatments to reduce severe illness.

3

## GET TESTED

If you have symptoms, were exposed to COVID-19, or are gathering with folks at elevated risk, get tested. Stay home and avoid others if you test positive, are sick, or were exposed.

4

## WEAR A MASK INDOORS IN PUBLIC PLACES

Especially if you or anyone you're in contact with isn't fully vaccinated or is elderly, immunocompromised, or has serious underlying health conditions.
