# Emerging Science on Omicron

Immunity from past Covid infection does not prevent Omicron infections well

- In a U.K. study, risk of reinfection with Omicron 5x risk of reinfection with other variants

mRNA Vaccines + boosters are effective at preventing Omicron infection and hospitalization

- In a South African study, 2 doses Pfizer vaccine had 34% effectiveness at preventing Omicron infection; booster raised effectiveness to 75%
- In another South African study, 2 doses Pfizer vaccine had 70% effectiveness at preventing Omicron hospitalizations

Early U.K. data suggests Omicron infections more often results in mild illness

- We have not yet seen how Omicron behaves among large numbers of unvaccinated and high-risk people

# Announcements from the State

**Boosters will be required for all healthcare workers**, including workers in health care facilities and those providing in-home healthcare services

---

**Test kits will be distributed to K-12 students** to facilitate testing upon return to schools

12/22/2021

# Managing a Winter Surge

**Priority #1:** Protect those most vulnerable to severe illness from COVID  
(including residents at SNFs and PEH settings)

**Priority #2:** Ensure hospital system is not overwhelmed

# Steps LA County is Taking to Address the Omicron Threat

- Aligning LAC HOO with state requirement for workers at health care facilities to be up-to-date on COVID vaccinations, including booster doses by February 1
- Strong recommendation for workers to use higher grade masks (surgical or respirators) at locations/worksites where they are in close contact with other workers or the public
- Distributing 600,000 rapid tests to hardest-hit residents
- Redoubling efforts to vaccinate and boost: County sites will only close on Christmas Day
- Protecting residents in long term care facilities and nursing homes
  - Weekly testing for SNF residents and staff; negative PCR/rapid test for visitors at SNFs
  - Rapid testing resources at LTCFs and SNFs
- Extending resources to people experiencing homelessness
  - Increased testing and vaccinations
  - PPE at shelters

# Steps LA County is Taking to Address the Omicron Threat

Increased communication with residents about how to stay safe over the holidays

- Town halls and community workshops
- Alerts to clergy and parents of children
- Postings on media platforms urging safety and testing at holiday gatherings

**If you test positive for COVID-19, you should:**  
**Si da positivo en la prueba de COVID-19, debe:**

-  1. Isolate yourself immediately.  
Aislarte de inmediato.
-  2. Tell your close contacts to stay home and quarantine.  
Dile a tus contactos cercanos que se queden en casa y se pongan en cuarentena.
-  3. Contact us at 833-540-0473 with any questions.  
Contáctenos al 833-540-0473 si tiene alguna pregunta.
