	Other	75.2	74.0	73.0	71.1	55.8	69.8

Assaults treated and released from emergency departments were identified as recommended by the Council for State and Territorial Epidemiologists: <https://resources.cste.org/Injury-Surveillance-Methods-Toolkit/Home/GeneralInjuryIndicators>

* All rates are per 100,000 population, and except for age groups, rates are age adjusted to the 2000 US population.

** We recognize that Asians and Native Hawaiians and Pacific Islanders are separate races. However, until 2019 these populations were reported as a single group by the data provider. In future updates of this table we will be able to report information separately for these populations.

- Rates were not calculated for other/unknown populations or for groups with <20 hospitalizations.
