274 Provider Network Data Reporting

What is the 274 Network Data Reporting:

The 274 Provider Network is an Electronic Data Interchange standard that will replace the NACT as the primary source for analysis of access to services, including network adequacy and timely access standards

DHCS has implemented the 274-submission process to streamline the reporting requirements among all other Counties.

How will this new process impact SAPC Providers?

As part of the 274 Data reporting, we are now required to submit complete, accurate, reasonable, and timely 274 provider network data monthly.

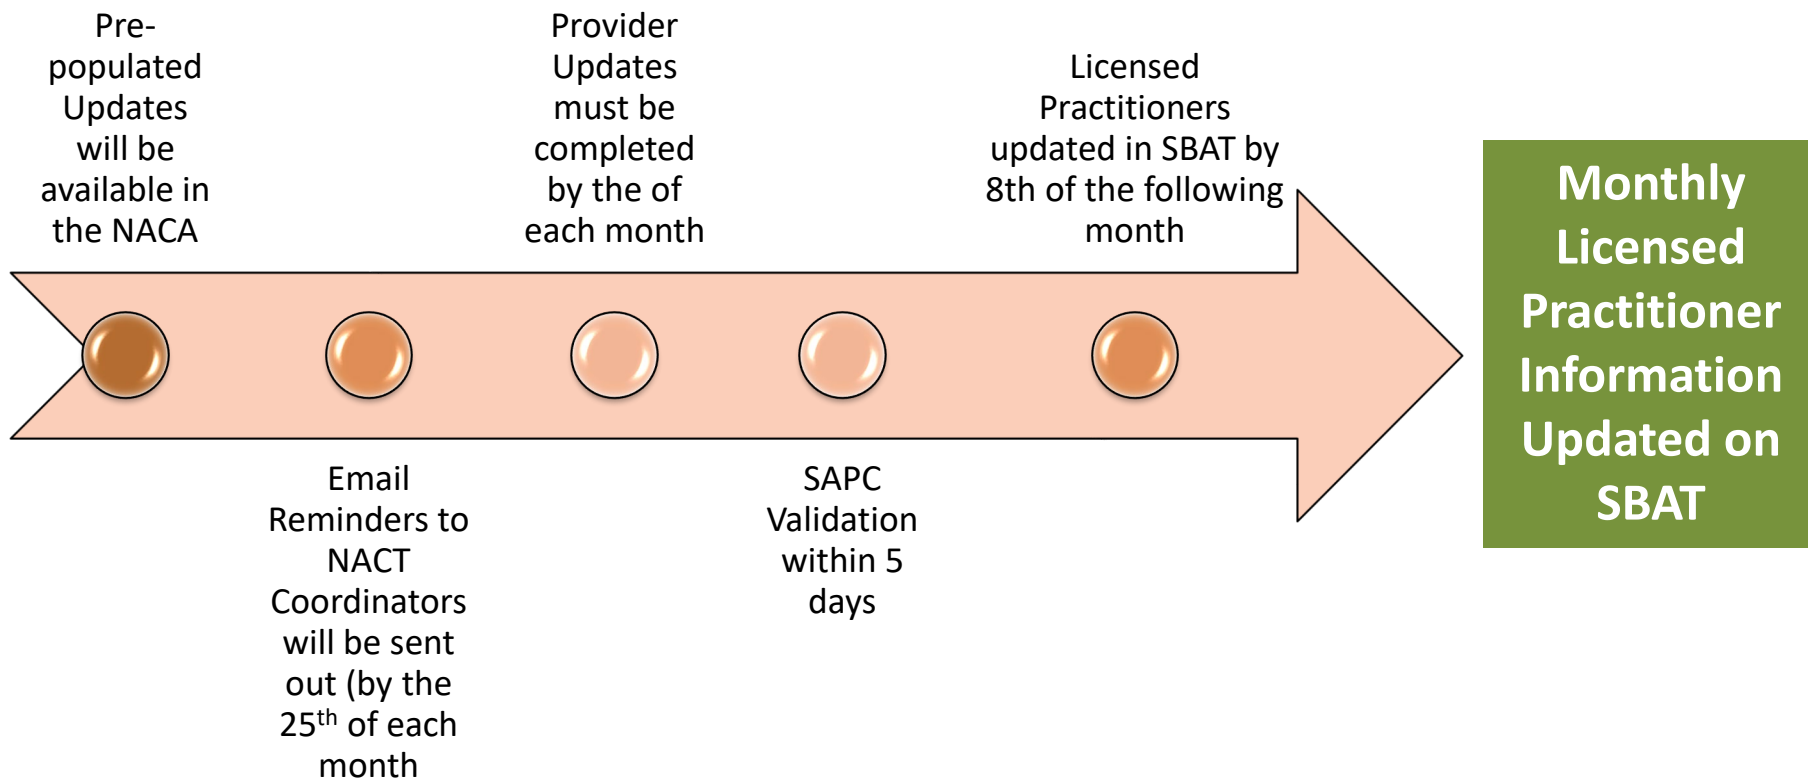

Monthly Updates

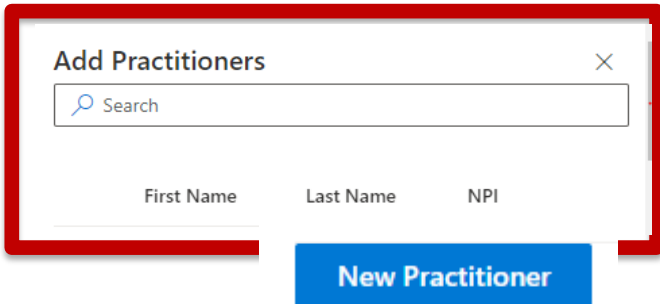

Each month providers will be asked to:

1. **Verify** the pre-populated practitioner information for each site. If there have been changes, update the NACA to reflect current information.
 - ✓ Credential and license Information
 - ✓ DOB, Gender, Email Address
 - ✓ Language Capabilities
 - ✓ NACT Coordinator and Back-up
2. **Add** any new practitioners that have not been pre-populated.
3. **Dissociate** practitioners no longer associated with the site.
4. **Verify** Current/Max beneficiaries for associated practitioners and update if there have been changes.
5. **Confirm** and SAVE all changes completed.
