

# Welcome!

# SAPC Provider Meeting

Michelle Gibson, Deputy Director

## FY 24-25: Capacity Building and Incentives

- **SAPC is preparing a package for Year 2 of Payment Reform**

- Capacity Building categories remain the same: Workforce Development, Access to Care / Reaching the 95% (R95), and Fiscal and Operational Efficiencies

- *Some efforts will carryover to allow providers who did not previously participate to implement these priority efforts*
- *Some efforts will be new to allow providers who did previously participate to continue to meaningfully implement and expand on priority efforts*

- Incentives categories are being evaluated and will build upon current priorities and figures to support continued improvement by the network

## FY 24-25 through FY 32-33: Capacity Building and Incentives

- **SAPC is developing a 10-year plan payment reform strategic plan, inclusive of rates, capacity building, and incentives.**
  - SAPC anticipates that many of the capacity building and/or incentives efforts will eventually be required, and thus strongly encourages participation while time-limited funding is available to support implementation/operationalization.
  - SAPC will continue to prioritize efforts essential to the SUD system, including workforce development and access to care.
  - Over the 10-year period, SAPC intends to decrease emphasis on capacity building efforts and transition to increasing use of incentives.
