

Proceed with **CAUTION**

Fentanyl test strips **DO NOT** detect all variations of fentanyl. Even if your test is negative, there may still be variations of fentanyl or other dangerous substances in your drug that are not detected.

Overdose prevention tips

If you are going to use:

- Use around other people.
- Use less and use slowly to see how it will affect you, especially if you are using something new.
- Avoid mixing alcohol with other drugs.
- Leave the door unlocked.

Make sure you or someone with you has naloxone, which is a lifesaving opioid overdose reversal medication.
