

Workforce Development Capacity

Building 1E: Addiction

Medication (MAT) Prescribing

Clinician Cost Sharing Start Up

Funding

Los Angeles County Department of Public Health

March 27, 2024

Substance Abuse Prevention & Control

Addiction Medication Prescribing Clinician Funding Opportunity

- Start-up funding is available to all SAPC-contracted treatment agencies
 - Ratio of \$200,000 **per** 40 hours/week of clinician time
 - \$200,000 **per** FTE one-time start up funding spread over two years:
 - \$150,000 **per** 40 hours/week during Year 1 (FY23-24)
 - \$50,000 **per** 40 hours/week during Year 2 (FY24-25)
- Designed to be combined / matched with local agency funds, and sustained beyond two years through SAPC billing for medication services
- Currently capped at a max of \$200,000 (per 40 hours/week) per agency (regardless of Tier)

Addiction Medication Prescribing Clinician Funding Opportunity

- **New** Capacity Building 1E Payment: **Optional and strongly recommended**. This project is for start-up funds. Providers will be paid once an addiction medication (MAT) prescribing clinician implementation plan has been submitted and approved and can be paid before the implementation has been initiated / completed.
- To receive advance funds, complete and submit the designated invoice **along with** the required implementation plan.
- Agencies will need to submit quarterly addiction medication (MAT) prescribing clinician implementation updates for approval to avoid recoupment. Expenditure verification is not required.

Addiction Medication Prescribing Clinician Requirements

- Implementation Plan must include integrating prescribing clinician(s):
 - Physician, Advanced Practice Registered Nurse, Physician Assistant
 - Clinical Pharmacist's scope of practice does not include SUD dx and clinical pharmacists do not independently meet clinician requirements for this incentive program
- Start up funding is available as a ratio to 40 hours/week
- Example: 20 hours/week = $\frac{1}{2}$ of \$200,000 = \$75,000 year 1, \$25,000 year 2

Addiction Medication Prescribing Clinician Requirements

- Prescribing clinician integration requirements
 - Prescribing clinician(s) works as a member of the agency care team
 - Can include more than one practitioner
 - For example, 40 hours/week can include two eligible practitioners working 20 hours/week
 - The clinicians' medication services are billed through SAPC (not through a managed care plan or other payer)
 - Must provide the full range of *applicable* addiction medication services as described within [SAPC Information Notice 24-01](#)
 - Methadone cannot be prescribed through pharmacies; non-OTP clinicians are not expected to provide treatment with methadone directly

– Optional Policy Template B for Residential and Inpatient Treatment Sites <i>(New - January 2024)</i>	 01/05/24
– Optional Policy Template C for Opioid Treatment Program Sites <i>(New - January 2024)</i>	 01/05/24

Addiction Medication Prescribing Clinician Requirements

- Prescribing clinician needs to be registered through PAVE as a SAPC-contracted agency practitioner
- Medical evaluation and management care can be provided in-person, through telehealth, and through telephone based on the **patient's** needs
- Medical care provided to patients on-site can be in-person or through telehealth/telephone
- Medical care provided to patients who are off-site can proceed through telehealth/telephone modalities **without** Field Based Services approval
- Medical care provided to patients who are off-site can proceed in person **with** Field Based Services approval

Addiction Medication Prescribing Clinician Requirements

- Prescribing clinician must provide medication services for not less than 20% of their hours per week on-site and in-person:
 - 20% of 40 hours/week = 8 hours/week in-person, on-site
 - 20% of 20 hours/week = 4 hours/week in-person, on-site
 - 20% of 10 hours/week = 2 hours/week in-person, on-site
 - 20% of 5 hours/week = 1 hour/week in-person, on-site
- Agencies are able to adapt the requirements for prescribing clinician time to meet agency and site-specific clinical needs (such as requiring more in-person, on-site prescribing clinician time)

Implementation Plan Components

- Agency current state
 - # and hours per week prescribing clinicians currently providing SAPC-funded medication services (unrelated to this incentive program)
 - Current state of which addiction medications are available on-site and approximation of the count / percentage of patients receiving medication services on-site
 - Confirmation of which residential sites of care (if agency offers residential LOC) already have been licensed to offer Incidental Medical Services (IMS)

Implementation Plan Components

- Proposed future state
 - Proposed hours/week prescribing clinicians to be recruited / integrated (as part of this incentive program)
 - Proposed timeframe for recruitment / implementation of prescribing clinician medication services
 - Delineation of prescribing clinician time allocated to which agency site(s) of care
 - Confirmation that the full range of applicable medications for alcohol, tobacco, and opioid use disorders will be available
 - Estimation of count / percentage of patients who are proposed to receive medication services
 - Plan for applying for Incidental Medical Services for any residential LOCs that don't already have IMS approval

Implementation Plan Components

- Planned implementation steps that include
 - Proposal staff trainings
 - Workflow development
 - Updating P&Ps
 - Documentation plan
- Medical Clinician Participation in SAPC-required meetings, which may include
 - Bimonthly MAT Action Team Meetings
 - Quarterly Medical Director's Meetings

Implementation Plan Components

- Proposed budget for cost-sharing
 - One-time start-up funds are designed to be matched against agency funds
 - Options for cost-sharing funds:
 - Recruitment costs
 - Medical Clinician compensation
 - Licensing needed software and related tools needed to operationalize medication services
 - Staff time needed to complete readiness activities (updating P&Ps, trainings, completing IMS)
 - Confirmation of other funding for medication services secured by agency
 - For example: Sierra Health Foundation's MAT Access Points grant for residential sites of care
 - Expenditure verification will not be required, but to avoid recoupment, provider agencies will need to submit quarterly implementation updates
 - SAPC's rates for medication services permit significant opportunity for revenue to keep services sustainable

Documentation Plan

- Medical practitioners should document through agency's existing documentation systems
- Billing is through existing SAPC billing process in accordance with the latest version of the rates and standards matrix
- For primary providers this may include uploading documentation from a practitioner's existing and external documentation system into PCNX
- Agencies should confirm practitioners either:
 - Have existing 42 CFR Part 2 compliant platform for computerized prescription / order entry, laboratory report review used to deliver integrated medication services
 - Develop their own 42 CFR Part 2 compliant capabilities for computerized prescription / order entry, laboratory report review

Forthcoming Dates

- Draft Invoice and Implementation Plan template released for comment by 2nd week of March
- Finalized / published week of April 1
- April 19, 2024 due date for Workforce Development Capacity Building 1E Addiction Medication Prescribing Clinician Funding Invoice and Implementation Plan
 - Extensions available on request **and**
 - Goal is first round of 1E start-up funds disbursed prior to June 30, 2024

Technical Assistance

- SAPC will publish suggested duty statement for addiction medication prescribing clinicians and recommendation for implementation plan components
