<p>Training Description and Core Clinical Components:</p>	<p>The ASAM criteria are a set of criteria for providing outcome-oriented and results-based care in the treatment of addiction. They provide separate placement criteria for adolescents and adults to create comprehensive and individualized treatment plans to be used in service planning and treatment across all services and levels of care. With the approval of the Drug Medi-Cal Organized Delivery System (ODS) Waiver (DMC Waiver), implementation of the ASAM criteria will become an integral part of system transformation in California. This interactive, skills-based training will begin with a brief overview of the ASAM criteria and a cross-walk between the levels of care articulated in the ASAM criteria and the levels of care defined by the DMC Waiver. Following this brief review, the presenter will focus the remaining portion of the training on a detailed review of the four progress note formats approved for use in clinical files by SAPC, which are: (1) SOAP (Subjective, Objective, Assessment, and Plan); (2) GIRP (Goals, Intervention, Response, and Plan); (3) SIRP (Situation, Intervention, Response, and Progress); and (4) BIRP (Behavior, Intervention, Response, and Plan), followed by instruction on how to develop a comprehensive, individualized treatment plan. Each focus group format will be reviewed in detailed, and participants will have the opportunity to practice drafting progress notes through a series of case scenarios.</p>
<p>Learning Objectives:</p>	<p>At the conclusion of the <i>ASAM Criteria and Documentation Training</i>, participants will be able to:</p> <ol style="list-style-type: none"> 1. Demonstrate ability to link the six dimensions of multidimensional patient assessment to individualized treatment plans 2. Use progress notes to demonstrate movement toward attain treatment plan goals 3. Demonstrate ability to use one of four SAPC approved progress note formats.
