

TB Clearance for K-12 Students

Visit your pediatrician or, if you don't have insurance, go to a [DPH Nurse Walk In clinic](#)

*The TB risk assessment can be completed up to a year prior, or 90 days after, entry to a new school district.

The provider will do a [Pediatric TB Risk Assessment](#) and order a TB skin or blood test and/or chest x-ray, if needed, along with the required physical exam for school entry.

Your provider will sign and complete the [TB Clearance Form](#) after confirming you do not have infectious TB disease, or if needed will direct you to appropriate treatment for TB infection or disease.

Give the signed, completed [TB Clearance Form](#) to your school nurse or other designated school official.
